	The project will target the non-displaced flood-affected persons who suffered a loss of assets or livelihoods. Vulnerable groups will be those whose homes and livelihoods were destroyed by the floods, especially those whose assessment will indicate that they may find it difficult to restore lost assets or livelihoods.
Project Cost (USD)	<b>462,038</b> (USD)

### Reporting Schedule

Type of Report	Due date
Situation report	30 November 2019  Quarterly
Final narrative and financial report (60 days after the ending date)	16 November 2020
Audit report (90 days after the ending date)	16 December 2020

Please kindly send your contributions to either of the following ACT bank accounts:

#### US dollar

Account Number - 240-432629.60A

Swift address: UBSWCHZH80A

Please note that as part of the revised ACT Humanitarian Mechanism, pledges/contributions are **encouraged** to be made through the consolidated budget of the country forum, and allocations will be made based on agreed criteria of the forum. For any possible earmarking, budget targets per member can be found in the "Summary Table" Annex, and detailed budgets per member are available upon request from the ACT Secretariat. For pledges/contributions, please refer to the spreadsheet accessible through this link <http://reports.actalliance.org/>. The ACT spreadsheet provides an overview of existing pledges/contributions and associated earmarking for the appeal.

Please inform the Director of Operations, Line Hempel ([Line.Hempel@actalliance.org](mailto:Line.Hempel@actalliance.org)) and Finance Officer, Marjorie Schmidt ([marjorie.schmidt@actalliance.org](mailto:marjorie.schmidt@actalliance.org)) with a copy to the Africa Regional Representative Elizabeth Kisiigha ([elizabeth.zimba@actalliance.org](mailto:elizabeth.zimba@actalliance.org)) /Africa Humanitarian Officer, Caroline Njogu ([caroline.njogu@actalliance.org](mailto:caroline.njogu@actalliance.org)) of all pledges/contributions and transfers, including funds sent directly to the requesting members.

We would appreciate being informed of any intent to submit applications for back donor funding and the subsequent results. We thank you in advance for your kind cooperation.

Head of Humanitarian Affairs

ACT Alliance Secretariat, Geneva

## **BACKGROUND**

### **1.1. Context**

On the morning of Friday, the 19 July 2019, the region of Montserrado, Grand Cape Mount, Margibi, Bomi and Lofa counties in Liberia, was hit by an extremely heavy downpour causing flash floods, leaving many towns around Monrovia and surrounding counties flooded. As a result, a woman and student drowned and at least 187 homes were damaged when rooftops were blown off leaving at least 42 people homeless. Several teams of first responders including National Disaster Management Authority (NDMA) staff are conducting field assessment and working with government agencies and international partners to support affected persons and communities. Initial reports show that approximately 25,000 people are affected (NDMA, July 2019). Many of the affected areas are the towns of Joe Blow, Unification, Duwo and Duazon and other areas surrounding Monrovia. Additionally, information emanating from the Meteorological Service indicate that the rains are expected to continue, and this may be seen as posing a serious threat of continuous flooding and damage.

### **1.2. Needs**

Presently, the government of Liberia through NDMA has raised early warning signs for disaster prevention. Such intervention requires the following actions:

1. Mobilization and distribution of emergency relief including Non-Food Items/NFIs
2. Mobilization of community response team through training and awareness.
3. Mapping most dangerous spots and rescue points in the event of flood disaster.
4. Development of early warning monitoring system to track indicators for potential flood disaster.
5. Opening and cleaning of drainages or waterway for the free flow of water.

### **1.3. Capacity to respond**

The Liberia ACT Forum has vast experience in the past in responding to various emergencies. LDS has worked on refugee and Ebola Crisis response. All projects have been done in close collaboration with various Government departments and other civil society partners. For example, in 2011, two of Liberia ACT Forum members Finn Church Aid (FCA) and the Lutheran Development Service in Liberia (LDS) provided emergency assistance to refugees from Ivory Coast hosted in Nimba County in Liberia with support from ACT Appeal (\$ 460,000).

Presently, there are 3 members of ACT Liberia Forum. It includes Lutheran Development Service in Liberia (LDS), Lutheran Church in Liberia (LCL) as an observer, and Finn Church Aid (FCA). Over the years, LDS – Liberia has been a requesting member during appeals and received rapid response funds through ACT humanitarian mechanism.

### **1.4. Core Faith values**

The Lutheran Development service will base the response on its core faith values throughout the implementation of the project.

## **2. PROJECT RATIONALE (see *Logical Framework [Annex 1]*)**

### **2.1. Intervention strategy and theory of change**

The Government of Liberia has raised early warning signs for disaster prevention and has proposed the following interventions.

1. Mobilization and distribution of emergency relief Non-Food Items.
2. Mobilization of community response team through training and awareness.
3. Mapping of most dangerous spots and rescue points in the event of flood disaster.
4. Development of early warning monitoring system to tracking indicators for potential flood disaster.

## 5. Opening and cleaning of drainages or waterways for the free flow of water.

LDS will support the affected HHs by building on capacity enhancement for disaster preparedness and community resilience. The project will support communities with knowledge and skills to prevent and manage flood disasters. The project will support to develop a reporting system or mechanism to track and report early disaster warning so that communities are aware of it before they occur.

The project will support affected areas to improve land use to enhance the overflow of water into drainages and creeks. If these aspects are not taken into consideration, there will be the continuous challenge of dealing with flooding within affected communities. With enhanced community capacity, these initiatives will support the process of reducing the risk of damage caused by flood and storms within their communities. Their involvement in the process will promote ownership and sustainability in the engagement.

### **2.2. Impact**

The project will support flood-affected communities through the provision of immediate non-food relief items, and strengthen community disaster preparedness and build community resilience to flood and storm disasters. Information on disaster prevention and management of environment to prevent adverse effects of floods will also be done, by improving the free flow of water in drainages and open new waterways to avoid the overflow of small streams or collection of water into the land.

### **2.3. Outcomes**

1. Life-saving needs of 1,392 HH are met through the provision of emergency Non-Food Items.
2. Selected beneficiaries will adequately utilize their knowledge and skills to prevent and manage flood disasters in their communities.
3. An effective mechanism established to deal with flood and storm affected communities in affected communities.

### **2.4. Outputs**

1. 6,960 beneficiaries from 20 communities receive assorted relief items (Household/hygiene kits).
2. 1,160 households benefit from non-food items.
3. 200 persons are mobilized and trained on disaster prevention and management from 20 communities.
4. 20 disaster management teams established in the 20 communities in 4 Counties
5. A disaster management tracking and reporting system developed to monitor situations of flood and disaster.

### **2.5. Preconditions / Assumptions**

Pre-conditions and Assumptions for the implementation of the project are:

1. The political situation in the country will remain stable.
2. Funding will be available for the implementation of the project.
3. Good road access will remain to affected areas during the project period.
4. Local leaders and community members will continue to be cooperative.

### **2.6. Risk Analysis**

Continuing downpour of rain could hinder the successful crossover into areas where affected communities live, and this could prevent the timely implementation of the project. Untimely transfer of funds could also impede the successful implementation of the project. Continue protest and violence as well as economic hardship would lead to instability within the country.

### **2.7. Sustainability / Exit strategy**

For ownership, the project will involve target communities. They will be supported and encouraged to continue with the project during upcoming flooding seasons after the project ends. For effective governance, a community management team will be setup to provide leadership on the project in the absence of implementing member (LDS team). The management team will be linked to local government authorities working on National disasters and other stakeholders who can continue to manage their communities in the absent of the requesting member once the project ends. The approach taken will be inclusive participation, networking and coordination

### **3. PROJECT IMPLEMENTATION**

Does the proposed response honour ACT's commitment to Child Safeguarding?  Yes  No

#### **3.1. ACT Code of Conduct**

Lutheran Development Service as member of ACT Alliance will adhere and implement the ACT code of conduct on the prevention of sexual exploitation and abuse. Lutheran Development Service will adhere to its policy on sexual exploitation and abuse during the implementation period. LDS staff will ensure that all staff have signed the code of conduct.

#### **3.2. Implementation Approach**

The Lutheran Development Service will work along with local authorities and community leaders to ensure that project is implemented in a participatory way. Local authorities will support LDS to identify the most flood-affected beneficiaries. Lutheran Development Service will also engage selected beneficiaries and affected communities to take ownership of the project for its sustainability.

#### **3.3. Project Stakeholders**

The project stakeholders will be the board of directors, Local Authorities, district development councils, community development committees, community-based organization and leadership from affected communities who will all be involved in implementation.

#### **3.4. Field Coordination**

LDS emergency coordinator will coordinate field staff and ensure that project is implemented in an efficient and timely manner. He will ensure that reports are done and submitted. The emergency coordinator will also liaise with LDS program office to ensure that the project is fully implemented in accordance with project documents. The emergency coordinator will monitor all field activities alongside project field staff and submit reports to the Executive Director through the program office.

LDS will share information on project activities with UN agencies and other relevant organizations in order to promote visibility of the work of ACT Alliance in Liberia. This will help to connect the Forum to other humanitarian and development organizations in Liberia thereby promoting partnership relationships with other humanitarian and development agencies in Liberia.

The implementation of the project will be coordinated with other members of the ACT Forum in Liberia, relevant government agencies and local government structures.

For this project, the Lutheran Development Service in Liberia will serve as the overall coordinator of this response and will coordinate with other ACT Liberia Forum members. In addition, LDS will work closely with the Government authorities in Liberia (local authorities) and other national and international organizations to ensure the effective planning, implementation and monitoring of the response. Furthermore, this kind of coordination will help to avoid duplication of relief efforts

Members of ACT Liberia Forum will jointly monitor project sites and support to improve the quality of the project. To improve coordination and sharing, ACT Liberia forum will hold regular meetings where members of the forum will receive updates on the activities of the project. In addition, relevant government agencies like the Ministry of Internal Affairs, local government structures kept informed on the progress of the project.

The affected population will be involved in the planning, implementation, monitoring and evaluation of the project.

The roles and responsibilities of the different members of the Forum will include planning, implementation, monitoring and evaluation of the project. At the same time, other agencies and stakeholders will be involved in the planning and implementation of the project to promote ownership and sustainability.

ACT Liberia forum members fits into Liberia country response by playing a role in working along with the community-members and other agencies of UN.

Under the project, ACT Forum will ensure that the relevant government agencies are involved and active in making sure that the root problems are resolved.

### **3.5. Project Management**

The project will distribute relief items to flood and storm affected population. Beneficiaries will be provided knowledge and skills on research-based advocacy. They will engage their government through advocacy to demand policy change in their community. The Lutheran Development Service will support actions taken through the advocacy initiative by the provision of technical and financial support.

### **3.6. Implementing Partners**

One of implementing partners, Lutheran Church in Liberia, (LCL) will work with the Lutheran Development in Liberia to implement the Protection/Psychosocial portion of the appeal while the Liberia Council of Churches (LCC) and the Christian Health Association of Liberia, (CHAL) will directly monitor the implementation of the Water, Sanitation and Hygiene WASH section of the appeal.

### **3.7. Project Advocacy**

The Project will carry out Policy advocacy during its implementation. Beneficiaries will be provided knowledge and skills on research-based advocacy. They will engage their government through advocacy to demand policy change in their community. The Lutheran Development Service will support actions taken through the advocacy initiative by the provision of technical and financial support.

### **3.8. Engaging faith leaders**

The project management team will engage key religious leaders in project communities before the implementation of the project. We will provide them basic information about the project to have them buy in to the project to ensure their people cooperate. In as much as faith leaders will be engaged but they will be kept away from the direct implementation because of their influence could undermine or overtake the project team.

### 3.9 Simplified Work Plan

		Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug
1	Hiring / selection of project staff and community initial assessments.											
2	Training community workers and creating awareness on disaster prevention.											
3	Community mobilization on clearing of waterways and drainages.											
4	Purchase / Procurement and transport of food and non-food items.											
5	Distribution of food and Non-food items											
6	Food Security and Livelihood Interventions											
7	Construction/Rehabilitation of hand Pump Wells											
8	Monitoring and evaluation											
9	Submission of narrative and financial Reports											
10	Audits											

## 4. PROJECT MONITORING

### 4.1. Project Monitoring

The Emergency Coordinator located in Bong County will be responsible for implementing and monitoring the project activities. Monitoring of activities in the other four counties will be coordinated from the Program Unit of LDS Central Office in Monrovia (since LDS does not have offices in those areas). The Emergency Coordinator will also be responsible for submitting SITREP and other reports after approval from the Executive Director. Monitoring and Evaluation activities will consist of monthly project field visits.

### 4.2. Safety and Security plans

The project has put in place a security plan, a relief policy on security which takes into account the safety of staff, items, transportation and storage facility. In addition, there will be a network for both the community and security for safe delivery of items or materials for distribution.

### 4.3. Knowledge Management

The project team will hold a monthly review of the activities to identify key lessons learned how they can share such knowledge or improve. The lessons learned will be communicated through reports and a publication of progress report. We will also use the government’s network meetings

of organizations working on issues of disaster management to share our lessons learned.

## **5. PROJECT ACCOUNTABILITY**

### **5.1. Mainstreaming Cross-Cutting Issues**

#### **Gender, Environmental, Participation, Resilience, Anti-terrorism and corruption**

The project will ensure that staff are gender sensitive. The process of mainstreaming will consider the specific needs of women, men, boys and girls. These needs will be in keeping with the project outcomes. Both women and men will be given the opportunity to participate without any form of discrimination. The knowledge of gender equality will be mainstreamed in the training to provide greater knowledge to community members.

Most often flood and storm disasters are associated with climate change or the environmental degradation. Therefore, the project will ensure that the ecosystem or environmental protection formed an integral part of the implementation. Environmental protection rules or policies will be adhered to during implementation. Knowledge about Environmental protection will be mainstreamed through the learning process. There will be value attached to beneficiaries because their participation is relevant to the outcome of the Project. The Project will also ensure that funds will be spent in accordance with grant agreement and the LDS Professional standards and other international standards as may be deemed necessary.

#### **5.1.1. Gender Marker / GBV**

The culture is a patriarchal system where men are given more power over women. Most of the women are poor and uneducated; therefore, they rely on their partners for support. Women are usually the custodian of the culture that victimized them. There is an increased rate of GBV and VAWs against women in these communities. This project will be keen on observing, preventing and reporting issues of GBV in keeping with the draft gender policy of the institution and the Domestic violence law of Liberia. We will collaborate with other actors in gender advocacy to provide the support for these communities.

#### **5.2. Conflict Sensitivity/Do No Harm**

LDS has been using participatory methods in nearly all its project intervention, especially the bottom-to-top approach. LDS will work with the local communities and Districts leadership in the project areas to avoid any conflict between selected and non-selected beneficiaries. This exercise will be carried out in a transparent manner where all community members will be present. LDS will also hire non -selected beneficiaries as casuals.

#### **5.3 Complaints Mechanism**

LDS-Liberia has a complaint Mechanism in place. The CRM has helped in building and concretizing relationship between project beneficiaries and LDS-Liberia. We have been using complaint boxes, telephone calls and community meetings to gather complaints. LDS in Liberia will ensure that a safe confidential, transparent and accessible complaints system established within each project location. LDS staff, project beneficiaries and community members (including women and children) will be involved and informed how to go to make a complaint and receive assistance.

Under the complaint mechanism there will be various forms by which people will make their complaint, by phone calls, hotline, complaint forms, complaint box and written report at field office and through community leaders or committees. Also, during focus group discussion and community meeting.

Complaints boxes are placed in all strategic locations in the community for complaint processing. The telephone numbers of all members of the complaint handling committee are also placed on the complaint form and boxes; while complaints are channeled through community meetings. Meanwhile, LDS will create awareness on CRM in all the project communities. The awareness will focus on how, what, who, where, when to process complaint; findings and action. There will be a monthly meeting of project beneficiaries with key community actors to assess the impact/progress of the project to include performance and behaviour. The M&E officer will develop a staff complaint form that will be filled in by community members without disclosing their identity. Complaints filed will be investigated, and is guided by parameters for appropriate decisions and action.

#### 5.4 Communication and visibility

For the issue of communication and visibility the Lutheran Development Service will produce a banner with a clear message on the intervention and the partners involve in the implementation. There will be branding of assets/equipment to give visibility to the project. There will also be publications in the local print media and the social media concerning project activities.

## 6 PROJECT FINANCE

## Annex 1 – Logical Framework

<b>Logical Framework</b>			
<b>IMPACT:</b> Overall Goal: Emergency Response to flood affected communities in Liberia.			
<b>OUTCOME(S)</b>	<b>Objectively verifiable indicators</b>	<b>Source of verification</b>	<b>Assumptions</b>
1. Improved the living condition of flood/storm survivors through the distribution of food and non-food items to affected communities.	1. 67% of the household life improved after the disaster period	1. Household Survey 2. Program Report 3. Monitoring and Evaluation	1. The flood situation will be minimized. 2. Box culvert will be constructed that will prevent the overflow of water
2. Improved their lives by providing safe drinking water to affected communities.	2. 45% of the affected community dwellers accessed clean and safe drinking water		3. Government will support the project
3. Improved drainages and watercourse in flood affected communities.	3. 75% of communities' drainages and watercourse line improved in the affected communities		4. Project will be funded
